

A photograph of a sunset over a desert landscape with mountains in the distance under a cloudy sky.

WE'RE HIRING

Full-Stack Software Developer

The Water Data Full-Stack Software Developer will work on open data projects to support the mission for the NM Water Data Initiative (NMWDI). This position will work with APIs and other data sources both from within the Bureau of Geology and external agencies to make water data available for visualization.

This full-time, one-year, remote or in-person position with benefits is available through the summer of 2024. This position is perfect for a recent graduate of a computer science, data analysis, data engineering, IT or software development program. The position may become long-term based on future grants and funding. The ideal candidate has a bachelor's degree with experience working in software design, cloud-based technology, data engineering and development, including familiarity with modern software development practices and object oriented software development (e.g., Java and Python).

The mission of the New Mexico Water Data Initiative is to make finding and using water data simple. Join our dynamic team working to improve the availability of water data for the people of New Mexico!

Send cover letter, resume, and application to
